in yassine-akermi

yassineakermi

u/Mikefacts

A passionate and avid learner software engineering student and freelancer.

EDUCATION

Faculty of Sciences of Monastir

Computer Science Bachelor Degree

2017 - 2020

Faculty of Sciences of Tunis

Software Engineering Degree

2020 - 2023

SKILLS

Javascript, ReactJS, React Native

Dart, Flutter

Python, Selenium, Scrapy

Java, Spring Boot

Firebase, AWS, Azure

EXPERIENCE

Web Development Summer Internship
Jun 2022 - Aug 2022

ERTC Funding, USA

During my remote internship in ERTC Funding, I was responsible for all tech-related projects that helped the company boost its performance and provided its clients with a great customer experience. I was entrusted with conceiving and realizing various financial web apps and supporting the team with any tech-related problems.

I have mainly worked on a web app which is a complex multi steps survey designed for the company's clients to collect all data needed about their business financial statements and build a thorough pdf report that will be routed to ERTC Funding's moday.com board.

Freelancing
2020 - Present

Private clients from Reddit

I have been freelancing with mainly private clients from Reddit for over two years. I have worked on many projects varying from web scraping with Python to web and mobile development with ReactJS and React Native frameworks. My clients are delighted with the quality of my work and many of them turned into recurring clients, which I'm very proud of.

End of Studies Internship
2020

Faculty of Sciences of Monastir

I have developed a mobile app for an Online Grocery Shop with Flutter and Firebase in an attempt to help people get their daily groceries from the comfort of their homes during the Covid-19 pandemic.

PROJECTS I'M PROUD OF

Financial Web Survey

ERTC Funding

2022

A complex financial calculator in the form of a survey created with **JavaScript** and **ReactJS** framework. The user will have to input their financial statement at every step of the survey. In the end, a pdf-generated report with all calculated data will be routed to ERTC's Monday.com board.

Inventory Management Mobile App

UK Clothing Shop

2022

An inventory and team management mobile app for a clothing shop from London. I was responsible with defining the functional requirements, designing the whole app on **Figma** and implementing the design with **React Native** framework. I used **Firebase** as a serverless backend.

Web Scraping and Automation

Freelancing Missions

2020-Present

Creation of various Python scripts with Selenium and Scrapy frameworks to scrape data from different websites and automate various complex tasks.
